Name: Max Tiessler
Student Number: 12234573

Motivation:

By taking this subject, I search to learn the foundational concepts of information visualization. Currently, while pursuing my MSc in Data Science at TU, I work as a research assistant at the UPC GESSI group, where I've developed a couple of visualization dashboards, including one featured in a tool paper publication (REFSQ 2024 Accepted Tool papers) and another for dendrogram generation (work in progress, see attached image). One of the issues that I found while doing my research, was that all the knowledge I had acquired was self-taught. That is why I see this course as a valuable opportunity to learn from a solid basis, from experts and with rigor, the basis of information visualization.
